System Pressure Advisory!

The water consumers of the Lake Waccamaw Water System in Columbus County are experiencing periods of low pressure and outages in the distribution system due to a **Loss of pressure at 3200 Canal Cove Rd.** Periods of low or no pressure in the distribution system increases the potential for back siphonage and introduction of bacteria into the water system.

Therefore, the Division of Water Resources advised that when water is restored consumers **boil all water** used for human consumption (including drinking, making ice, brushing teeth, washing dishes and food preparation) **or use bottled water.**

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

This office is strongly urging the water consumers to conserve water whenever possible. **This advisory remains in effect until further written notification is issued.**

This advisory is issued for 3200 Canal Cove Rd. to the end of Waccamaw Shores and includes Wooded Acres Subdivision.
